### Push The Hogs.

From the Farm and Home.

To get a quick growth on a pig, first get the right kind of stock, then feed plenty of various kinds of food and give a good roomy pen. Some hog raisers have the best stock obtainable, but they do not succeed in getting them as large at a certain age as others. The most of the hogs that are raised in our country have good enough blood in them to make a fast growth if properly cared for, but we all have so much pushing work on the farm that we neglect our hogs more than anything else on the place. If we expect good results we must do our part, and when we do this we will be rewarded by it. We often notice in a litter of pigs one or two small ones, and we generally know why they are smaller than the others—because they do not get their share of milk from the dam. When we see a pig that is getting behind the rest we should manage some way to feed it and keep it growing right along, for just as it becomes stunted we will find it a poor feeder. It never will grow as fast as the others. This is why some breeders have an uneven lot of pigs. After the pigs are weaned and we begin to feed them we will find the larger ones crowding the smaller ones away from the trough.

A good idea would be to take all the smaller ones and put them by themselves and give them all they can eat of various kinds of food, such as shipstuf, bran, corn meal, whole wheat and an occasional feed of oil meal. You cannot get a quick growth on a pig with corn. They soon get tired of it, become feverish and begin to root in the ground for something to cool their scorched stomachs. The pig that has a good range will always do better than those put up in small pens no matter how you feed them. Exercise is as essential as good feed in order to produce a fast growth. Do not shut little pigs in a tight pen and confine them to corn if you want to hurry them into the market. The cheapest way to raise hogs is the quickest way.

### SEPTEMBER WEATHER.

Prophet Foster predicts the kind of weather to be looked for in September. He says:

Very considerable rainfall will occur during the first week in September and severe storms.

The storm wave of that period will reach the Pacific coast about September 1st, cross the west of Rockies country by close of 2nd, great central valley 3rd to 5th, eastern states 6th.

Warm wave will cross the west of Rockies country about September 1st, great central 3rd, eastern states 5th.

Coal wave will cross the west of Rockies country about September 4th, great central valleys 6th, eastern states 8th.

September rainfall will be generally above average along and near the 40th parallel from Philadelphia to Denver tapering off towards drouth north and south and west of the section mentioned.

A drouth will occur all around the excessive rainfall district.

Dangerous storms will occur from the 16th to 23rd and killing frosts following the storms of that period.

Most rains will occur during the first third of the month and least during the middle third.

The greatest extremes of temperature will occur from about the 15th to 20th.

Reader, did you ever take SIMMONS' LIVER REGULATOR, the "KING OF LIVER MEDICINES"? Everybody needs take a liver remedy. It is a sluggish or diseased liver that impairs digestion and causes constipation, when the waste that should be carried off remains in the body and poisons the whole system. That dull, heavy feeling is due to a torpid liver. Biliousness, Headache, Malaria and Indigestion are all liver diseases. Keep the liver active by an occasional dose of Simmons' Liver Regulator and you'll get rid of these troubles, and give tone to the whole system. For a laxative Simmons' Liver Regulator is BETTER THAN PILLS. It does not gripe, nor weaken, but greatly refreshes and strengthens.

Every package has the Red Z stamp on the wrapper. J. H. Zeilin & Co., Philadelphia.

Mr. Cleveland is frequently credited with being firm in his opinions and courageous in his convictions, but on some matters of importance he shows a liability to change just as many other people do. In his former administration he made an order forbidding officials, appointed by him, to participate in politics. He forbade any officeholder from engaging in a political contest with the enemy, but when he wants his own party and as many of the Republicans as he can get converted to his un-Democratic principles of gold monometallism, he encourages even the members of his cabinet to go out and make speeches. This shows Mr. Cleveland to lack firmness, rather than to be in the possession of it in a marked degree. When Wall street's interests dominate everything else, Mr. Cleveland has shown that he is willing to change his plans and principles to accommodate the Shylocks and plutocrats that run the moneyed institutions along that thoroughfare.

It is predicted that before many years the sunflower will come into general cultivation in this country. As a plant it has no superior for vigor, rapid growth and prolific yield of seed, leaves and stalk, all of which can be utilized. The seed are especially good as feed for fowls, and when mixed with grains they are relished by all farm animals. Fifty bushel of seed to the acre is a fair yield, and this will produce fifty gallons of oil worth \$1 a gallon. In China a valuable fiber, used in silk weaving, is obtained from the stalks and they are of service as fuel and a source of potash. The Orientals mix their tobacco with cured sunflower leaves, and make a yellow dye from the flowers, which are also rich in honey and wax. The sunflower grows riotously in the United States, and stands all extremes of weather well. Plainly, it is one of nature's great gifts, but as yet unappreciated.—Globe Democrat.

Patrick Grove, with several aliases, the worst all round thief and cracksmen in the country, was arrested by detectives in St. Joseph last Monday. He was wanted in Denver, Minneapolis and several other places for stealing diamonds and other valuables, also for robbing an express train near St. Joseph. He made his escape from the St. Joseph jail some time last year, we think it was.

### OUT OF THE COMMON.

Michigan has decided that for judicial purposes an oath administered by telephone is binding.

In 1882 it took 324 bushels of wheat to pay for a self-binding reaper, while a better one can be bought this year for the price of 187 bushels.

Miss Douglass, the champion markswoman of England, recently scored fifty-seven bull-eyes in succession with a revolver at a twenty yard range.

It is said that Mrs. Edmund Yates carries her husband's ashes around with her in a little casket which is fitted into a traveling bag of special design.

The cats of the Isle Man are as destitute of tails as if they were guinea pigs. It has never been accounted for, but in spite of being unscientific, it is a fact.

### OLD WINE IN NEW BOTTLES.

If it is worth while to be religious at all, why not be in earnest about it?

If we are preparing to live in a world where we may not stay a day, why no prepare to live where we shall have to stay forever?

It ought to be reason enough for doing anything, to know that God wants it done.

The Bible is full of promises of the same kind of help from God that a worldling may expect from his money.

God's work never waits for the man who isn't ready.

The man who will not set his face like flint against all sin, cannot expect to receive pardon for some sin.

The only teachable people in anything, are those who know their ignorance and want to get rid of it.

Nothing but sin ever made anybody doubt the divinity of Christ.

Before Adam and Eve were turned out of Eden, God gave them a promise that pointed straight to Christ.

When God answers our prayers of faith he lets us know it.

A man may be made believe that he has gold in his hand when he has not, but he cannot be deceived about the unspeakable peace of Christ.

There are some who enthrone God upon the hills of intellectual speculation, who never think of extending his kingdom down into the valley of real life.

The man who has been with Jesus never has to wear a badge on his coat to proclaim the fact.—Ram's Horn.

In a recent letter to the manufacturers Mr. W. F. Benjamin, editor of the Spectator, Rushford, N. Y., says: It may be a pleasure to you to know the high esteem in which Chamberlain's medicines are held by the people of your own state, where they must be best known. An aunt of mine, who resides at Dexter, Iowa, was about to visit me a few years since, and before leaving home wrote me, asking if they were sold here, stating if they were not she would bring a quantity with her, as she did not like to be without them. The medicines referred to are Chamberlain's Cough Remedy, famous for its cures of cold and croup; Chamberlain's Pain Balm for rheumatism, lame back, pains in the side and chest, and Chamberlain's Colic, Cholera and Diarrhoea Remedy for bowel complaints. These medicines have been in constant use in Iowa for almost a quarter of a century. The people have learned that they are articles of great worth and merit, and unequaled by any other. They are for sale here by W. C. Gaston.

### HOW TO CLEAN NECKTIES.

Take eighteen grains of white powdered castile soap, five fluid drachms of strong aqua ammonia, twenty-four grains of granulated saltpeter. First dissolve the soap in one pint of warm soft water; then add the saltpeter, and after it has dissolved, add the ammonia. Set aside over night, or the equivalent ten hours, and then it is ready to use. Take a cloth or small sponge, and after wringing it out of this mixture, gently rub the ties until all dirt disappears.
